

## Our Products

### TAM-1 Capacity – Turnkey Performance

- **100G & 400G wavelength services** delivering high-speed data transport.
- **End-to-end integration** with terrestrial backhaul for seamless Data Center-to-Data Center or Premise-to-Premise connectivity.
- Ideal for **carriers, enterprises, and governments** who need fast, reliable, and neutral connectivity without managing optical equipment themselves.

### TAM-1 Share Spectrum Solution – Control with Flexibility

- Optimize investment by acquiring **the spectrum you need**, expanding as workloads grow.
- Combines the **freedom of dark fiber** with the cost-efficiency of spectrum sharing.
- Provides **isolation and performance guarantees**, ensuring security and autonomy.
- Designed for **cloud providers, carriers, and platforms** seeking control over transmission without full fiber ownership.

### TAM-1 Dark Fiber – Maximum Autonomy

- **Exclusive fiber pair ownership** for long-term independence.
- **25 year IRUs** guarantee predictable investment and control.
- The most future-proof option, allowing you to **design, upgrade, and operate** your own optical layer.
- Ideal for **hyperscalers, OTTs, governments, and critical infrastructure operators**.

## Our Story

Trans Americas Fiber System (TAFS) was created with one mission: **to bridge the digital divide across Latin America and the Caribbean.**

We saw the region's potential but also its connectivity gaps – and we decided to act. With **TAM-1**, our next-generation subsea and terrestrial system, we're building an **open, carrier-neutral network** that doesn't just move data, but drives **innovation, inclusion, and opportunity.**

From cloud and AI growth to government modernization, TAFS is **more than a cable** – it's the foundation for a digital future that works for everyone.

## Why Choose TAFS?

- ✓ **Carrier-neutral by design**  
we enable fair, open access for all.
- ✓ **Strategically connected**  
linking the U.S., Latin America, and the Caribbean across 9+ countries.
- ✓ **Future-proof infrastructure**  
engineered for AI, OTT, and 5G scalability.
- ✓ **Resilient & ESG-driven**  
sustainability, inclusion, and regional empowerment are built into our DNA.

## Renewing Connectivity Across The Americas

### Reshaping the Digital Future of the Americas

At TAFS, we believe that connectivity is more than infrastructure — it's the foundation for opportunity, innovation, and inclusion. Our mission is to connect the Americas with **state-of-the-art subsea and terrestrial fiber optic systems** that deliver speed, resilience, and neutrality.

We are **bridging the digital divide** across Latin America and the Caribbean, enabling governments, enterprises, carriers, and cloud providers to thrive in an era defined by **AI, cloud computing, and 5G**.
